TECHNICAL SKILLS

- **Front-End**: HTML, JavaScript (ES6+), Bootstrap, SaaS, React (DOM, JSX, Redux for state management, component lifecycle), responsive design, mock-ups, and storyboards, asynchronous programming (Promises, async/await), API integration, Webpack, Babel, and unit testing.
- **Back-End**: Node.js, RESTful APIs, server-side development, middleware integration, and database management, Authentication.
- **Software Tools**: Experience with various graphics, database, animation, and web optimization tools.
- **Version Control**: Proficient with Git for version control and collaboration.
- **Testing & Quality Assurance**: Conducting security tests, ensuring quality control, and optimizing performance.
- **Other Skills**: Strong client focus, problem-solving, and teamwork abilities.

EDUCATION

Master of Applied Computing   Apr 2023 - Sept 2024
University of Windsor, Windsor, ON

Bachelor of Computer Engineering   Jul 2018 - May 2022
Sarvajanik College of Engineering and Technology, Surat, India

PROFESSIONAL EXPERIENCE

Full-Stack Developer   Apr 2022 - Mar 2023
Toshal Infotech, India

- Developed full-stack web and mobile applications using ReactJS for front-end and NodeJS for back-end development, integrating custom middleware and RESTful APIs.
- Consulted with clients to understand and document website requirements, ensuring user-centric solutions.
- Created mock-ups and storyboards to visualize web designs and flow.
- Conducted end-to-end testing, security checks, and debugging, resulting in optimized performance and reliable applications.
- Collaborated with designers and product managers to implement technical specifications in line with business objectives.

Front-End Developer   Jan 2022 - Mar 2022
Krtya Softwares, India

- Designed and integrated user-friendly front-end interfaces using ReactJS, focusing on responsive design and performance.
- Created dynamic content using various web graphics and animation tools to enhance user experience.
- Collaborated with back-end developers to ensure seamless API integration and efficient data flow.
- Conducted quality control and testing to meet client requirements.

PROJECTS

Apple Variety Identification Application   Apr 2024 – Jul 2024
- Developed a web-based application that helps identify different apple varieties using image analysis and user inputs.

Intraday Stock Screening Application   Dec 2023 – Mar 2023
- Built a platform for users to screen stocks based on real-time data, implementing visualizations and data filtering mechanisms.

Learning Management System   Jan 2022 – Sep 2022
- Designed a responsive, user-friendly web application for educators and students, featuring course management and real-time notifications.

E-Commerce Website   Oct 2021 – Dec 2021
- Created an end-to-end e-commerce platform, including payment processing, user authentication, and product catalog management.
